### PROFESSIONAL PROFILE

Project manager in the web development space leveraging studies with a master's in applied project management and full-stack web development both completed through the University of Adelaide. Extensive experience delivering projects across differing industries that provide business value from maintenance management system development and implementation to major asset construction projects. With newly formed skills and understanding of front-end and back-end web development technologies I am in endless pursuit of delivering web projects that have purpose and deliver real value not only to the business but to those that use them.

Offering a unique perspective from previous experience in projects and passion for digital technologies I'm well positioned to apply my strengths in team collaboration, stakeholder management and real world problem-solving to the benefit of the organisation.

### PROFESSIONAL EXPERIENCE
